

The people behind these products

Jet Inc. has been providing dependable and affordable wastewater treatment since 1955.

Since 1955, Jet, Inc. has focused on one fundamental goal: to make ourselves as valuable to our customers as our customers are to us. That focus has kept our emphasis on inventing, developing and testing the right products supported by the right services. The result: Jet is the respected world leader in wastewater treatment technology.

Jet engineers have developed the wastewater products with the industry's longest service life and lowest repair rates. Our engineers work closely with our distributors to identify future needs. New products are always in development as our engineers work to accommodate the future needs of the industry we serve. Market-driven research and development, tough testing standards and our emphasis on quality assurance guarantee that Jet will continue to lead.

Inside our factory, Jet employees manufacture these precision-engineered products of the highest quality

materials. Our quality control team factory-tests them to guarantee they deliver maximum performance at minimum maintenance.

Every Jet employee working in our factory in Cleveland, Ohio and each member of our powerful, worldwide distributor network have been extensively trained and is up to date with all industry standards.

Our powerful, worldwide distributor network sells, installs and services all the exceptional products presented here in our literature and online at **www.jetincorp.com**. Each distributor works closely with building owners and managers and state health authorities to determine what solutions are needed now and for the future.

Jet People

The results of this teamwork and training are described inside this Jet products folder. The exclusive Jet treatment method is used in municipal, industrial, marine and commercial applications, and it's replacing the outdated septic tank and all its problems. Jet Residential BAT[®] Media plants have been thoroughly proven in the field and tested by private and government organizations, where top quality specifications must be met. They are performing effectively for the U.S. Army Corps of Engineers, the U.S. Navy and the U.S. Postal Service. You will also find Jet plants servicing installations where the rigid terms of VA and FHA insured loans must be met.

Jet is the industry pioneer, and you can count on us to engineer and build the future for wastewater treatment as well.
