

Ark-type extinguishing device of FM200

GAS EXTINGUISHING SYSTEM

Product description:

Ark-type extinguishing device of FM 200

High-pressure carbon dioxide automatic extinguishing system

FM200 automatic extinguishing system

(IG-541) blending gas extinguishing system

Water fog extinguishing system

Low-pressure carbon dioxide extinguishing system

High-pressure carbon dioxide automatic extinguishing system

FM200 automatic extinguishing system

(IG-541) Blending gas extinguishing system

Water fog extinguishing system

Low-pressure carbon dioxide extinguishing system

□ Foam Fire Extinguisher

Foam Fire Extinguisher is suitable for fire on oils, petrol, paints, varnishes and other highly inflammable liquids.

□ Foam Proportioning Equipment

Pressure air Foam Proportioning Equipment is the main equipment of the foam fire extinguishing system. As the fire pressure water flow across the equipment, foam liquid

□ Mobile Foam Fire Extinguishing Device

Mobile Foam Fire extinguishing Equipment also called Pipeline Foam Fire Extinguishing Equipment. It could be used after joining up fire hose coupling and water supply source coupling in series. Mainly use for extinguishing type I, II, III non water-solubility liquid fire and type I, II, III liquid loading area and the easy leakage occasion of store area. This system applies to government residential district and easy leakage occasion of store area.

Operation

Connecting the water supply source with influent coupling of equipment, and provide pressure water not lower than 0.20 MPa, as the motive power water flowing with proportion mixer, and it will generate negative pressure, the foam inside the equipment will be aspirated, and automatically mixed in a certain proportion, mixed liquor flow to the foam spray gun through deliver hose, the mixed liquor will be discharged by the jet tube of foam spray gun at the same time, mixing with air to frothing again. At last, foam will be discharged to extinguish from gunpoint.

□ Trailer Foam Fire Extinguishing Equipment

ZPT500 Trailer Foam Fire Extinguishing Equipment is mainly used for extinguishing type I, II, III liquid fire and ease of solubility solid fire, also used for extinguishing the general class fire A (such as papers, wooden, etc.)

- Owned power, shortcut and convenient to be used.
- Stable discharged pressure, discharged at constant pressure.
- Assembled by two sets of ZPT250, you can operate one of them to work independently or both at the same time when appearing minor fire.
- It could be used in low price generally, and low cost. Each foam tank only have to purchase 8kg 3% AFFF every time.
- Stored long-term, there is premixing foam liquid store inside the tank for five years.
- Long range, suitable for long distance discharge.
- In case of fire, it could combine with powder extinguisher, far and near, extinguishing more effectively.
- Small changing radius of products, apply to the occasion with narrow street.

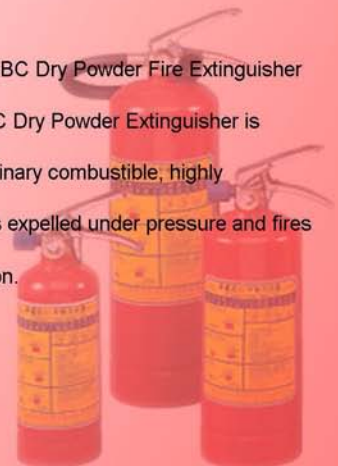

□ Wheeled BC Dry Powder Fire Extinguisher

Wheeled BC Dry Powder Extinguisher is suitable for highly inflammable liquids, gases expelled under pressure and fires under electric tension.

□ Wheeled ABC Dry Powder Fire Extinguisher

Wheeled ABC Dry Powder Extinguisher is suitable for fire on ordinary combustible, highly inflammable liquids, gases expelled under pressure and fires under electric tension.

□ ABC Dry Powder Fire Extinguisher

- ABC Dry Powder Extinguisher is suitable for fire on ordinary combustible, highly inflammable liquids, gases expelled under pressure and fires under electric tension.

□ Suspended BC Dry Powder Fire Extinguisher

Feature XZFTBL Suspension BC Dry powder suitable for highly inflammable liquids, gases expelled under pressure and fires under electric tension.
Operation: there is a fixed temperature sprinkler in the Suspended BC Dry Powder Extinguisher, in case of fire, glass bulb will broken, operated the sprinkler, nitrogen inside the extinguisher drives the extinguishing agent to discharge.

□ BC Dry Powder Fire Extinguisher

- BC Dry Powder Extinguisher is suitable for highly inflammable liquids, gases expelled under pressure and fires under electric tension.

□ Suspended ABC Dry Powder Extinguisher

ABC Dry powder Extinguisher is suitable for fire on ordinary combustible, highly inflammable liquids, gases expelled under pressure and fires under electric tension.

Operation: There is a fixed temperature sprinkler in the Suspended ABC Dry Powder Extinguisher, in case of fire, glass bulb will broken, operated the sprinkler, nitrogen inside the extinguisher drives the extinguishing agent to discharge.

□ CO2 Fire Extinguisher

- CO2 Fire Extinguisher is suitable for smothering fires on oils, greases, flammable liquids and gases, electric appliances instruments, mechanical equipments, etc. at the initial stage.

□ Wheeled CO2 Fire Extinguisher

Wheel CO2 Fire Extinguisher is suitable for smothering fires on oils, greases, flammable liquids and gases, electric appliances, instruments, mechanical equipments, etc. at the initial stage.

Fire Monitor Series

- 1) PS water monitor
- 2) PL dual purpose monitor for foam and water
- 3) PSY portable water fire monitor
- 4) PPY portable foam fire monitor
- 5) PSKD electric water monitor
- 6) PSKD20 electric water monitor
- 7) PPKD electric controlled foam monitor
- 8) PS16, PS19 water fire monitor
- 9) PL16, PL19 dual purpose monitor for foam and water
- 10) Remotely electric controlled monitor system
- 11) Fixed dry power extinguishing system

PS water monitor

PL dual purpose monitor for foam and water

PSY portable water fire monitor

PPY portable foam fire monitor

PSKD electric water monitor

PSKD20 electric water monitor

PPKD electric controlled foam monitor

PS16, PS19 water fire monitor

PL16, PL19 dual purpose monitor for foam and water

Remotely electric controlled monitor system

Fixed dry power extinguishing system

Digital picture controlled monitor

Spare Parts for digital picture controlled monitor system

ABC dry powder extinguishing agent

Digital picture Controlled Monitor System

1. Digital picture controlled monitor
2. Spare parts for digital picture controlled monitor system
3. Control panel for digital picture controlled monitor system
4. ABC dry powder extinguishing agent

Control panel for digital picture controlled monitor system
