

□ ISGK Pressing Rotary Outer Cylinder-Type Screw Press

- High Performance Type with Less Power consumption
- Low Price and Low Running Cost
- Our press is light in weight and has a simple structure. This results in easy operation and maintenance.
- No noise or vibration is generated due to low rotation speed.
- No filter cloths are used. Only one polymer liquid is required for operation.
- Only simple deodorization is required because the machine is airtight.
- Less wastewater is produced because less water required in the washing procedure.
- Cake moisture content and treatment volume can be adjusted.
- Applications:
 - Surplus Activated Sludge Treatment
 - Industrial Waste Water Sludge Treatment
 - Sedimentation Sludge Treatment

□ ISD Lasta Filter

- Superior High Dryness Dewatering Performance
- Increased Processing Capacity
- Complete Cake Release
- Ultra-Light Weight
- Rapid Cloth Washing
- Simple Cloth Changing

• Applications:

- Agricultural Products
- Fermentation Broths
- Gypsum, Kaolin
- Metallic Compounds Oxides, Hydroxides, Carbonates and Sulfates
- Flotation Concentrates Copper, Gold, Zinc, Iron, Lead and Nickel
- Mineral Processing Coal Fines
- Leaching Processes Nickel, Zinc, Gold and Silver
- Chemical Processes
- Pigments & Dyes
- Talc
- Sludge
- Industrial, Alum, Blast Furnace, Smelter Wastes and Scrubber Blowdown

□ ISD-G Lasta Filter

- Minimum Space Requirement
- Low Operating and Maintenance Cost
- Labor Saving Operation
- High Productivity
- High Cake Dryness

• Applications:

- Agricultural Products
- Fermentation Broths
- Gypsum, Kaolin
- Metallic Compounds Oxides, Hydroxides, Carbonates and Sulfates
- Flotation Concentrates Copper, Gold, Zinc, Iron, Lead and Nickel
- Mineral Processing Coal Fines
- Leaching Processes Nickel, Zinc, Gold and Silver
- Chemical Processes
- Pigments & Dyes
- Talc
- Sludge
- Industrial, Alum, Blast Furnace, Smelter Wastes and Scrubber Blowdown

□ Fiber- Wakishimizu

- IEG-Bob, Filtration
- Filter media is light, change easy (IEG-Bob, correction)
- Filter media washing effective
- Filter washing media is simple
- Continuous operation
- Low maintenance cost

• Applications:

- Advanced treatment of industrial water
- Advanced treatment of sewage
- General waste water treatment
- Filtration processing of seawater (Aqua culture, the chemical industry)
- Purification of pool water
- Purification of the aquarium and the zoo
- Purification of pond and fountain water
- Fish farming
